

Automated Reporting

Mission and Values.

Our mission is to improve your profitability through simple automated reporting processes making you as our valued customer, satisfied with the service provided whether it is a Fleet Management Service or a Higher Level Reporting Service.

We at DBSU believe this can be achieved by not compromising honesty or quality and maintaining our integrity. This is reflected in our dedication to produce the right product through years of research and development which we will continue to do to improve the service by staying ahead of technology through innovation.

Some of the DBSU Team members.

David Black – Founder and Managing Director.

For the last 30 years David has been a High Level Programmer and Civil Engineer, and co-founded and managed more than 5 diverse successful companies simultaneously in Southern Africa which included a Construction Company, Plant Hire Company, Property Development Company, a Quarry, and Truck Service Center. David moved to Australia in 1999 and has held various roles successfully which in general have covered Project Management and Commercial Management in mostly the Civil and Mining Sectors.

Vivienne Fallon – West Australia

With over 25 years of experience in Accounting and Site Administration on Civil and Mining Projects across Australia, and working on Oil Exploration Projects in Nigeria and Libya, Vivienne brings a wealth of skills to the Team.

Emily Needham – Service and Support.

Having utilized the Product on an ongoing basis in a meticulous fashion, as well as her assistance in producing excellent Training Manuals, Emily is the first point of contact when you are struggling with any element of the Product.

Erica Humes – Marketing and Sales.

Erica has a strong back-ground in Human Relations and Property Development and her driven attitude to offer a good service, her Sales and Marketing knowledge and good communications skills are an asset to the Team.

Mathew Lee Black – Installations and Support Southern Africa.

Mathew's computer and IT skills allow him to completely understand the high level of quality control required when overseeing the configuration and installation of devices. Mathew currently resides in South Africa so he generally manages the Southern African installations requests.

Taryn Jacoby – UK Sales and Marketing. BA Marketing & Media

Denis Humes – photo required.

Denis has over 30 years of knowledge as a Business Systems Analyst in particular the 4GL Environments.
Denis is based in Brisbane Australia.
